## Fusheng Southeast Asia MA Training program

### Introduction

The spirit of “Pursuing Excellence, Enriching Life” has been living in every corner of Fusheng since its establishment in 1953. Employees are the most critical success factor of the company’s growth.

Being the leading brand in the global compressor industry, we provide different types of total solutions and products for our customers with different needs, including air compressors, refrigerant compressors, oil-free centrifugal air and gas compressors. Our professional territory has been successfully branched out into China, European and American. We have a rapid growth in Southeast Asia in the past few years, and expanded our operations in Thailand, Malaysia, and Indonesia.

### Training program

“Fusheng MA program” is an intensive, one-to-two year, development program designed to cultivate the future leaders in overseas subsidiaries or branches in Thailand, Malaysia and Indonesia. The management associates will receive comprehensive compressor knowledge and technical skills training, well-designed cross function job rotations, and special project assignment. The management associates who pass the assessment with outstanding performance will be assigned to a management position in oversea subsidiaries or branches after the completion of MA program.

### Qualification

1. Bachelor degree in mechanical / electrical engineering is plus. Other majors who are interested in air compressor business also acceptable.
2. Thai, Malaysian, and Indonesian nationality students in Taiwan can apply for an internship.

### Language Skill

Fluent in English; Chinese is a plus.
